

Notice of Limitation and Severance of Liability

GC Green Carbon Inc., its heirs, affiliates and assigns as listed, are concerned with the delivery of destruction, neutralization, oxidation, relocation, isolation, removal, and reassignment of physical compounds generally related to the abandoned materials and byproducts class which it deems professionally capable, with the securing of correct resources, of successfully stewarding and managing these compounds for a gainful fee which secures its staff and representatives, shareholders, creditors and clients interests.

GC Green Carbon Inc. assumes no liability for any financial, legal, or technical or scientific or policy obfuscation or untimely delay of services imposed upon it, or its heirs, affiliates, assigns, customers, regulators, professional and science associates, and its shareholders and creditors.

Assumes no liability for petty or criminal corporate neglect of the past, present, or future with respect to GC Green Carbon Inc. physical remediation activities, petty criminal, corruption or serious criminal activity or conduct of any third party, including sovereign nations or deemed equivalents, including international conflicts, wars, cultural and military disputes and injustices, class disputes, political disputes and injustices, human rights injustices, religious injustices and disputes, mental anguish and emotional, genetic, congenital or psychological damages, and property or financial disputes between any of these indirect or direct in the realm of abandoned emissions.

Assumes no liability for Past, present and future health damages of any kind resulting from the act of any party abandoning emissions to the air, water or sea, which GC Green Carbon Inc. cannot provide remediation for due to financial, technical, political, cultural, ethical or other corporations' policies, or poor or inaccurate standards in communications, education and journalism.

GC Green Carbon Inc. assumes no liability for delivery delays due to pertinent R&D, innovation, scientific research, lack of education or awareness, and developmental delays in technology in any society or party or third party.

Clinically, scientifically, historically and forensically accurate attribution data regarding atmospheric emissions, which may be collected for planning and other physical remediation purposes, will be in archives, based on the present state of the art in a data collection.

With all of these under consideration, due care and attention to the treatment of abandoned emissions as heretofore described, to the best of its technical ability, will comprise the products and services of GC Green Carbon Inc.
