

GC Green Carbon Inc. CO₂ Offset Program for Emissions Announced

Retool and Remediate™

CO₂ emitters can have a proven remediation system placed on their stacks that will offset all past and future CO₂ emissions for 10% of their liability and \$10 per offset using our technology. (based on a CO₂ Equivalent)

GC Green Carbon Inc. has pioneered a Cap and *KEEP* total stack solution TSS™ system that gives back the Carbon in a usable or permanent above ground form to industry, while remediating all of its historical emissions.

Our patent pending technology is available worldwide from our base in Vancouver BC Canada. Our Official launch will be May 1, 2017.

Our Chemical solution is FDA approved, non toxic to humans, animals, and plants.

Contact our Office today to learn how we can assist your industry with its emissions future today.

Phone: 778-809-1702

The great news is: globally, carbon based industry has the capacity to remove 70ppm of the CO₂ equivalent greenhouse gas effects in our environment, while capping its emissions with GC Green Carbon Inc. technology. Our Greenhouse gas status is at 478ppm CO₂ equivalents today.

Please note: GC Green Carbon Inc. is only able to perform the physical-environmental remediation with our technology and services, and cannot remediate social, cultural, and governmental issues around CO₂ Emissions. The *non-physical environment* issues likely need to be remediated by another body or group of bodies.
